

# NOVA URBAN 56000 SERIES

The Nova Urban (Narrow) 56000 & 57000 series is the latest generation of the Nova Urban which replaces the highly successful 51000 and 55000 series.

The main benefit of this latest version is that the narrower width allows easier fitment to a wider range of vehicles and with the option of recline on one side only, the seat is as much as 85mm narrower than the previous versions. The fixing holes under the seat are the same as the older Nova Urban and Nova Classic seats making these totally interchangeable with other Chapman products.
